Administration

<https://my-controlpanel.co.uk>

Content News

The first item in the administration tab is a simple list of the dates on which the content that we supply has been updated on your site.

Also listed are the dates of the mailers that have been sent such as the latest monthly newswire. Selecting a title on the left will give you further details in the right-hand box.

Go to My Website

Exactly as suggested, this is a quick link to your website.

Simply click the link to open up the site in a new browser window.

Your Contact Details

This is where you need to update the contact details of the best people that we can contact for admin, marketing or billing queries etc.

On the Address tab your current address is required. These are for our records and won't update anything on your website.

Online Forms Submitted

This area stores any data that has been entered into your website forms as a back-up for the original email that is sent.

Please email us to see if it is possible to set this up for any forms on your site.

Change your Password

We recommend changing your password regularly to help increase security and lower the risk of someone else logging in to your account.

You should always try and use a different password across any online accounts you have and sites that you use that require a registration or sign up, rather than using the same password for all.
